

Zonos Classify

Automagically generate HS codes with a product image, description, or UPC code.

Automate HS/HTS code classification

It's now easier than ever to harmonize a product catalog. Zonos Classify uses advanced technology for HS code lookups, including image recognition, product description, or UPC code. HTS tariff code support is also included for 217 different countries.

Ideal for: anyone needing to classify cross-border goods

Classify features

- On-demand classification
- Advanced image recognition
- UPC code lookup
- HS code support
- HTS country code support

"Zonos' suite of products is very well thought through with the customer (end user) and client (business owner) in mind. The level of support we get from their team is absolutely outstanding."

 (G2 reviews)

"Zonos takes the in-office load off of international ecommerce. Amazing product and even more amazing customer service."
